File Uploading process

Phone Validation · https://verify550.com/documentation/file-uploading-process-2/

Verify550 provides multiple avenues for importing your phone list for validation. You have the option to upload CSV and TXT files directly from your local computer drive or from cloud storage platforms like Google Drive.

You can use the drag-and-drop feature to transfer your list from your local drive directly into the designated area indicated by the dotted outline.

Alternatively, you can use the ‘Import lists’ option and follow the straightforward steps to upload your list.

You can also fetch the list from a web server for seamless integration. While uploading a file, make sure the following conditions are met for the process process to work smoothly:There is only one phone number in each row.

Phone numbers should appear in the same column. The field names should appear in the first row of the list in order to categorize the list.

There is a 25MB file size limit for phone validations.
