How it works

Phone Validation · https://verify550.com/documentation/how-it-works-2/

With 20 years of marketing experience under our belts, we were not satisfied with off the shelf phone validation solutions, so we built our own. Our proprietary “Carrier-Direct Line Intelligence" uses a multi multi-pronged approach that connects directly to carriers using CNAM, LRN and other protocols.

This multi pronged approach gives us the most accurate results in the industry.
